PREPARED FOR SRIDHAR PATNAIK, GREYBOARD CONSULTING (NEXUS360)

Builder conversations for Nexus360: we research the real owner, message where a WhatsApp number exists, and hand every genuine reply to you

This is an **indicative** estimate. It will change once we have your requirements (questions on page 3). Everything below is limited to what we are sure we can deliver for the price stated.

1
Find
Builders from the public Chhattisgarh RERA register, filtered by rules you approve.

2
Research
The real owner or decision-maker where public evidence supports it, each with a source, a date and a confidence label.

3
Message
Up to two approved WhatsApp messages with a personalised page and video, only to a business-published WhatsApp number.

4
Hand over
Every genuine reply goes to you. No AI conversation with an owner.

What you get for this estimate

- **A researched list** of up to 50 Chhattisgarh builders with owner or decision-maker records, sources and confidence labels. You keep it.
- **Reusable material:** approved messages, a page and a video for Nexus360.
- **A measured answer in two weeks** to what decides whether outbound works for you: can owners be reached on WhatsApp, do they respond, does anyone want a demo.
- **Every genuine reply handed straight to you**, with a read-only view of the whole campaign.
- **Your time back.** Researching 50 builders by hand takes roughly 12 to 33 hours (15 to 40 minutes each), before any drafting or follow-up. ASSUMPTION
- **A written report on Day 17** with a clear recommendation: continue, change or stop.

Scope and price (before 18% GST)

	TWO-WEEK PILOT	MONTHLY RUN (AFTER THE PILOT)
Builders	Up to 50	50 or 100 a month
Messages	Up to 2 per builder, only where a WhatsApp-capable business number is published	Same
Includes	Research records, one master video, a personalised page, hand-off to you, a read-only view of your campaign (a link or a shared export), a report on Day 17	Everything in the pilot for new builders, a weekly report, template and number upkeep
Fee, from	**₹40,000** fixed, includes the one-time set-up	**₹25,000** per month for up to 50 builders (₹35,000 for up to 100). Stop at the end of any month
WhatsApp	From **your own WhatsApp Business account**, set up by us in your name; you keep its balance. Pilot message charges: about ₹50 to ₹230. ASSUMPTION	

Shared-risk alternative to the monthly run: ₹15,000 a month plus ₹4,000 for each demo held with an owner-level contact (15 minutes or more, confirmed by you). Prices are proposals, valid until 3 Nov 2026. If our AI provider changes its prices, we will tell you and review the fee.

One sales employee, our system, or both

The monthly run costs less than one employee, but it does a different job: it researches, drafts, sends and tracks, and it does not close deals or build relationships. What decides it is how many real conversations each one produces, which nobody can say yet.

	ONE SALES EMPLOYEE Raipur, Bhilai or Rajnandgaon	OUR SYSTEM pilot, then monthly run	BOTH
Monthly cost ASSUMPTION	About ₹36,900 all-in (pay ₹25,000, PF, incentive, phone, laptop, hiring and ramp). Excludes travel, gratuity and leave.	From ₹25,000 a month for up to 50 builders, ₹35,000 for up to 100 (indicative), plus WhatsApp charges from your own balance.	The system fee plus the employee.
Time to start ASSUMPTION	4 to 8 weeks to hire, then about 3 months to full speed.	First sends about 7 days after we have your inputs, subject to Meta's approvals.	As the system. A hire adds the hiring time.
Research	By hand, builder by builder (15 to 40 minutes each, our assumption).	Up to 100 builders a month, with a source, a date and a confidence label on every record.	The system researches, the person checks the best ones.
Talking to owners	Yes: phone, visits, Hindi and local dialect, objections. Can confirm by phone who the owner is.	No, by design. Every genuine reply goes to you.	You or the executive.
Records, and if it stops	Depends on discipline. If the person leaves, contacts leave unless logged.	Every send and reply is logged. Stop at the end of any month; you keep the records.	Both.
Cannot do	Research hundreds of builders a month, or log everything by itself.	Talk to an owner, phone, visit, negotiate or close. Promise a reply. Reach Madhya Pradesh.	Fix a weak offer.
Results so far	None yet for Nexus360.	None yet for builders. Our own first campaign: 9 contacted, no confirmed genuine reply, 2 of 7 templates on time. Too few to conclude.	None yet.

Our recommendation. Decide by the measured pilot, and add an executive only if owners reply. If the pilot shows that owners can be reached and answer, the system keeps your executive's time for the part only a person can do. OPINION

What we do not promise

Replies, demos or customers. That every owner's direct number can be found. That every builder can be messaged: in our small test of 6 builders, 1 had a business-published number wired for WhatsApp, and the owner could be named for 4 (none fully verified) FACT, SMALL SAMPLE. Madhya Pradesh is not automated: its RERA website asks bots to stay out, so we would ask for permission or research it by hand.

What can change this estimate

Each item below is added only if you ask for it, and is priced in the written scope after your answers.

IF YOU WANT	HOW IT IS HANDLED
More builders than the pilot or monthly limits	Priced in the written scope
A separate personalised video for every builder	Quoted after we see your screen recordings (one master video is included)
Hindi or Gujarati page, video and messages	Priced per language, one-time
Another state's RERA register (where its website allows it)	Priced per state, one-time
Campaign leads pushed into Nexus360's own CRM	Quoted after we see your API or a test account
Email as a second channel	Priced one-time
Phone calls or voice notes to owners	Not included; priced separately
Your WhatsApp account (your number, GST details, display name)	Set up by us and included; you keep the balance. Subject to Meta's approvals

What we need from you (five short answers)

1. **Your goal:** what exactly do you want from this, and what would make you say after one month that it worked?
2. **Volume:** how many properly researched builders a month, in which cities and of what size?
3. **Extras:** do you also want a CRM with this, and should each builder get a short video and landing page, or is a plain WhatsApp message enough?
4. **Replies:** when a builder replies, who takes over and on which number?
5. **WhatsApp account:** we set it up in your name and connect it to our system. We need a mobile number for it (not already used on WhatsApp), your GST number and business name. You keep the balance. Is that OK?

How the dashboard works

A read-only view of your campaign only: the builder list with confidence labels, what was sent, delivered and read, and every reply handed to you.

Next steps

1. You answer the questions above (one reply is enough).
2. Within two working days we send the confirmed scope and price in writing, and a short demo on real Chhattisgarh data.
3. You decide on the two-week pilot.
