PREPARED FOR SRIDHAR PATNAIK, GREYBOARD CONSULTING (NEXUS360)

Indicative estimate for Nexus360, to be confirmed after your requirements

What we do, in one sentence. We build a short, sourced list of Chhattisgarh builders who are building right now, name each one's likely decision-maker with the evidence (or say "unknown"), send each reachable builder one WhatsApp question about how they track site material and enquiries, and pass anyone who replies straight to you.

PILOT · ESTIMATE

from ₹48,000

+ 18% GST. Up to 50 builders in Chhattisgarh, about 14 days of sending, report on Day 17. Fixed once we confirm it in writing.

IF YOU CONTINUE · ESTIMATE

from ₹30,000 a month

+ GST. Up to 100 builders a month. The pool is limited, so later it shrinks to new registrations, from about ₹15,000.

PASSED THROUGH AT COST

WhatsApp ₹1.5

per delivered marketing message + GST, no markup. About ₹10 to ₹100 for the pilot; never over ₹300 without your approval. ESTIMATE

What the pilot includes, and its limits

Builders	Up to 50, Chhattisgarh only, chosen from the public RERA register by rules we agree with you.
Research	One record per builder: sources, dates, and a Verified / Likely / Unknown label on the owner or decision-maker. Up to 10 manual company-record lookups. A builder we cannot resolve within a time limit is marked Unknown.
WhatsApp	English, up to 2 messages per builder and 100 in total, only to numbers the business itself published, each checked by a person first. STOP honoured at once. Sent from our account on a +91 number, under a sender name we agree with you.
Page and video	One master video (up to 45 seconds) and one personalised page per messaged builder. No video made per builder.
Hand-off	Every genuine reply forwarded to the person and number you name (up to 30 alerts). No AI answers an owner.
Read-only view	Campaign only, no phone numbers or personal contacts: a weekly snapshot page and a CSV for you and one colleague, walked through each week on a screen-share.
Reports, changes	A mid-pilot note and a Day 17 report with an updated estimate. One round of changes to page, video or message text.

Not included, priced on page 2: calls, email, CRM integration, Hindi, other states, Madhya Pradesh, handling of replies by us.

179 builders

have a project under way in Raipur, Durg and Rajnandgaon; 376 in all Chhattisgarh. Our count from the public register, 20 Oct 2026, approximate. FACT

About 8 of 50 would be messaged

50 builders researched

about 8 have a business-published WhatsApp number (2 to 28)

about 2 to 5 of those messages delivered

If our small test (1 of 6 builders) holds and 30 to 60% of messages arrive. ESTIMATE

What we promise

- Researched records for up to 50 builders, every fact with a source and date. Where we cannot find the owner, the record says Unknown.
- A first message and at most one follow-up, only to published numbers, only after a person on our side has checked the record, always with a STOP option.
- Every genuine reply forwarded to the person you name. We stop messaging a builder at once after any reply or STOP.

What we do not promise

- **Replies, meetings, demos, customers** or any reply rate. Our own first campaign: 9 contacted, no confirmed genuine reply; 2 of 7 cold WhatsApp messages arrived on time. FACT
- An owner's direct WhatsApp number. In our test of 6 builders an owner or decision-maker was named for 4 (none fully verified), a WhatsApp-capable published number was found for 1, a verified direct owner number for 0. FACT, SMALL SAMPLE

What can change this estimate

None of these is in the pilot price. One-time unless marked, before GST, roughly largest first. Every range is our indicative figure ASSUMPTION and any extra is agreed in rupees before work starts.

IF YOU ASK FOR	EFFECT ON THE PRICE, AND WHAT TO KNOW
Your CRM	**Quoted after a short free look at its API.** Until then you get a weekly CSV.
Calls made by us	**₹8,300 to 25,000 per 50 builders.** Not included; your team calls the warm replies.
Another state	**₹8,000 to 20,000 per state,** where the register allows automated access. Madhya Pradesh does not (its RERA site disallows bots): a hand-built list is about ₹250 to 670 per builder, or we ask MP RERA for permission. Neither is promised.
A live dashboard with its own login	**₹6,000 to 20,000, then ₹1,300 to 2,200 a month,** instead of the weekly snapshot.
Email as a second channel	**₹5,000 to 9,000, then ₹1,000 to 4,300 a month.** Reaches builders with no WhatsApp number; needs a reply address someone watches.
Hindi, or a video for each builder	**₹4,000 to 9,000 per language; ₹3,000 to 5,000 for per-builder video.** Hindi includes a native-speaker check.
Also messaging the mobile filed on the RERA page	**₹1,000 to 3,000, then ₹800 to 2,000 a month.** Raises reach, but you told us these are often not the owner and Meta's opt-in risk is higher. OPINION: NOT WHERE WE WOULD START
More builders	**About ₹6,000 per extra 50 in a month** (₹36,000 for 150). The pool is limited: about 376 builders with a project under way in Chhattisgarh.
Faster start, extra follow-ups or rounds	**₹4,000 to 12,000** to start faster (it cannot beat Meta approval, our +91 number or your inputs); **₹500 to 1,000** per extra follow-up; **₹2,000 to 4,000** per extra change round or report.

What we need from you

Six answers, even rough ones.

1. **Where first:** which districts, and which builders (size or type) should we include or skip?
2. **Who to reach:** the owner only, or also purchase and accounts heads?
3. **Volume:** how many builders a month, and how many demos a week can you take?
4. **Replies:** who answers a genuine reply, on which number, in which hours?
5. **Assets:** 2 to 3 screenshots or a short screen recording of Nexus360, and your logo?
6. **Sender:** display name "Nexus360" or "IV Infotech", on a +91 number? WhatsApp only, or also email?

Before the first send we also need your written OK on the message text and your customer list (registered company names). Eight smaller questions can wait for a call.

How the read-only view works

- **This campaign only.** Builders researched, owner or decision-maker with a confidence label, messages sent and delivered, replies handed to you, and demos you log yourself.
- **No contact details.** Company names and roles from public sources, no phone numbers, nothing from our other campaigns or our costs.
- **In the pilot:** a weekly snapshot page and CSV on a screen-share. We never share our own console login.
- **Expect zeros first.** It shows sent, delivered and replied, not opens, which scanners make unreliable. For your CRM later, tell us whether it has an API or CSV import.

Compared with hiring one sales executive

One executive in Raipur, Bhilai or Rajnandgaon costs about ₹36,900 a month all-in. ASSUMPTION Our monthly run costs about the same but does a different job: it researches and sends, and cannot talk to an owner. Which brings more real conversations nobody can say yet. Judge it by the Day 17 report. OPINION

Next steps

1. You send rough answers to the six questions.
2. We confirm scope and a fixed price in writing. Nothing starts or is charged before you approve.
3. We walk you through our process on sample records, about 3 working days after your screenshots arrive. ASSUMPTION
4. Earliest realistic first send: mid-November, after Diwali. ESTIMATE

This estimate assumes your inputs arrive on time (if not, the dates move by the same number of days), that a +91 WhatsApp number can be arranged with our provider (we are confirming messaging and platform prices of 20 October 2026), and that our direct cost per builder or per message rises by more than 25%, we pass the actual increase through at cost after 30 days' written notice, and you may stop without penalty. Reply on the WhatsApp chat you received this from. IV Infotech
